

**F**ilaments for the x-ray generators manufactured by Rigaku, Siemens and Elliot can be repaired by Scientific Instrument Services™. These instruments, which are used in crystallography, utilize coiled tungsten filaments. S.I.S.™ can repair these filaments at a large savings over the cost of replacement filaments from the manufacturer. The repaired filaments have demonstrated performances at least equal to the original filaments supplied by the manufacturers. Various shapes and sizes of coils are available, a few of which are shown on the heater coil page.
