

A64 Direct Probe Sample Vials

Straight Sealed Pyrex Sample Vials

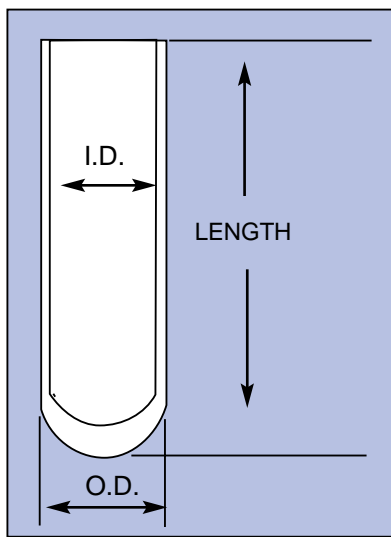

S.I.S.™ continues to offer two styles of direct probe sample vials: straight vials and the flared top vials that are used in the Thermo mass spectrometers. All vials are made to your specifications. Straight vials are supplied in packages of one hundred (100), five hundred (500), one thousand (1000), or five thousand (5000). Lengths from 5mm to 30mm are available. Outside and inside dimensions currently available are listed in the accompanying chart. Other dimensions are available on special request.

Vials are constructed of Borosilicate glass (Pyrex). O.D. tolerances are ± 0.02 mm (0.001 inch) and length tolerance is ± 0.10 mm (0.005 inch). The ends are cut clean and straight. Vials are clean and contamination free.

Buy in larger quantities and save. All lengths from 5 to 30 mm are available at the same price
