

# A80 Metric Stainless Steel Screws

The machine screws listed below are constructed from type 18-8 stainless steel. They can be used in mass spectrometers and other scientific equipment. Cheese head, socket head and flat head phillips type screws are available as shown in the diagram. In addition to the types and sizes listed below, any other type or size is available on special request. Screws may be slightly magnetic.

Cheese Head - Slotted Screw

Socket Head - Cap Screw

Flat Head - Phillips Screw
