

Column Installation Kit

The Capillary Column Installation Kit contains:

- Diamond tipped pencil or sapphire cutting pencil
- 20X magnifier
- Ferrule tool
- Septum tool
- Refillable 2 oz. bottle of "Snoop"

The individual items in this kit cost _____ more each if purchased separately. Packaged in a convenient cut foam tray.

Snoop® - 8 Ounce (236mL) Bottle

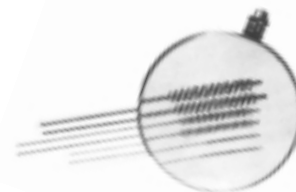

The 8 ounce squeezable bottle comes with a Snooper Tube extendible up to 12 inches (30cm). Snoop is recommended for use in leak-testing any pressurized gas system, liquid line, or vacuum system. Snoop is applied in a solid stream to the top or bottom of the connection or area being inspected. If bubbles form around the area of application, a leak exists.

Part No.	Description	Price

SNOOP8	Snoop - 8 ounce bottle	

Stainless Steel Cleaning Brushes

These new stainless steel brushes are ideal for cleaning GC injection ports and other instrument parts.

Flame Detector Cleaning Kit

This easy-to-use kit improves sensitivity, reduces noise, and

decreases detector spiking.

The Complete Maintenance Kit includes:

- A set of jet reamers with a unique spiral design that cleans without scratching.
- Two minibrushes (one brass, the other stainless steel).
- A dual ended handle for jet reamers and brushes.
