

Bench Type Cylinder Holder

Model 508

This holder is designed to prevent toppling of cylinders when they are used next to a lab bench or hood. The holder body is made of cast aluminum and can be attached securely to a table top without marring the surface. The strap is nylon web and includes a sturdy buckle. The holder handles cylinders from 4 to 14 inches in diameter or up to two cylinders 9 inches in diameter.

Cylinder Hand Trucks

Models 6502 and 6503

These heavy duty cylinder hand trucks are specifically designed to handle and transport compressed gas cylinders easily and safely over all types of surfaces, even gravel beds. They will eliminate the cause of serious accidents that can occur when cylinders are rolled or dragged. These trucks are well balanced and feature rear carriage supports making them exceptionally easy to maneuver through the most crowded laboratory or plant areas.

Design Features

- Heavy duty construction for extra strength
- Model 6502 designed for use with all size cylinders; Model 6503 for 1A size cylinders only
- Large hi-load capacity wheels roll easily over door saddles, floor cracks, or yard areas with-out loss of control
- Precision balanced for easy loading
- Model 6502 features the extra safety of rigid rear carriage supports
