

D76 SGE Autosampler Syringes

Autosampler Syringes

Dual Gauge

- narrow gauge at front end for on column injection.
- wide gauge to increase strength.

Cone Tip

- minimizes septum coring
- ideal for autosampler use

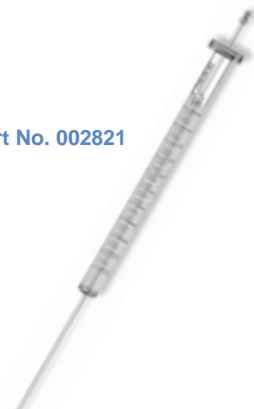

- The most comprehensive range of trouble free autosampler syringes available.
- Syringes designed and tested to meet critical autosampler specifications.
- Unique plunger design to eliminate bending and seizing.
- Needle point style developed specifically to withstand multiple and fast septum injections.
- Superflex syringes available for HP7673 autosampler.

Agilent Technologies - 7673, 7683 & 6850 ALS
