

Turbomolecular Pump Repair Kits

Turbomolecular pump repair kits are available from Eagle Instrument Services. Are you tired of simple bearing replacements causing downtime while you ship your turbo pumps out for repair? Now there is a solution! **Turbo Kits**. Specially designed parts and manuals for easy bearing and seal replacements without the hassle or downtime of sending your pumps out for repair. We work closely with some of the leading manufacturers to ensure that our kits are supplied with the best possible parts.

Each repair kit comes with top grade bearings, seals, O-Rings and where appropriate wicks and felts. Also included is a CD manual and instructions.
