

## Low Lint Wipers

For cleaning instrument parts, printer components or wherever critical cleaning is required.

## Non-Contaminating

The low lint and fuzz-free characteristics allow either dry or solvent cleaning without depositing cloth residue on sensitive surfaces.

## Construction

Tightly woven construction of 178 threads per square inch for the highest quality lint free wiper available.

## Non-Abrasive

The twill weave, designed for particle entrapment, permits particles of dust, grit, and grime to fall from contact surfaces into the weave pattern. This ensures scratch-free wiping of the most delicate areas of data processing equipment, such as magnetic heads and other critical surfaces.

## Static-Free

Because these wipes are pure cotton, they do not require antistatic finishes to neutralize static charges as in synthetic materials. Result: Electrostatic charges, which attract lint and dust, are not imparted.

## High-Absorbency

Contains no added binders, fillers, gelatins or metallic salts and is, in essence, purified cotton. Its rate of absorbency is almost instantaneous.

## Techni-Cloth™

Techni-Cloth combines the soft strength of polyester with the high absorbency of cellulose to create a wiper whose low particle count and low order of extractables makes this an ideal low priced wiper for use in the most critical areas. Its edges reseal after cutting, preventing loose fibers from linting onto contacted surfaces. Techni-Cloth will not scratch or abrade precision components.

## Other Properties

Techni-Cloth has good dimensional stability to heat. It is quick drying, rot and mildew resistant, and has a low electrostatic discharge and a high permeability to water vapor. Soluble extractables of non-fibrous materials are extremely low.

- High Absorbency, Superior Strength
- Use With Solvents
- Non-Abrasive

Part No.	Description	Price/bag
604	Techni-Cloth 4" x 4"/1200 pcs/bag	
606	Techni-Cloth 6" x 6"/600 pcs/bag	
609	Techni-Cloth 9" x 9"/300 pcs/bag	
612A	Techni-Cloth 12" x 12"/150 pcs/bag	

## Ordering information Disposable Low Lint Wipers

Part No.	Size	Qty/pkg	Price/pkg
304A	4 x 4 bias cut	1200 pcs/bag	
306A	6 x 6 bias cut	600 pcs/bag	
309A	9 x 9 bias cut	300 pcs/bag	
312A	12 x 12 bias cut	150 pcs/bag	
7TJGGL00	17 x 17 bias cut	75 pcs/bag	

## Blue wipes

High Quality Cellulose and Polyester Blend Cleaning Cloth in a convenient dispenser bag.

## Highly Absorbent, Durable

Blue wipes combine the strength and Lint-free characteristics of polyester with the excellent liquid retention of cellulose to form a durable, absorbent multi-purpose wiping cloth.

## Ideal With Solvents

Ideal with solvents or aqueous solutions. Blue wipes retain their strength even in the wet state. Laboratory tests indicate that water, detergents, alcohols, dry cleaning solvents, halogenated hydrocarbons, ketones and other cleaning agents have little or no effect on the unique properties of the cloth.

## Convenient

Blue wipes are C-folded and packaged in a convenient dispenser box for quick and easy access. Blue wipes are enclosed in a thermally sealed, antistatically treated poly bag to protect the product from external contamination.

Part No.	Description	Price/bag
512	Blue wipes 12" x 12"/50 pcs/bag
