S32710	.010"
S32715	.015"
S32720	.020"
S32725	.025"
S32730	.030"
S32740	.040"

Stretch-It PTFE Sealing Tape

Non-adhesive and stretchable Sci/Spec PTFE tape may be just what you need to prevent that problem from being a problem. Keep several sizes handy for that emergency that just won't wait. Use Stretch-it PTFE Sealing Tape to seal, cover, or insulate irregular surfaces. Use it on the lips of flasks, test tubes, beakers, bottles, etc. Tighten up those leaky threads. This 3 mil thick tape remains pliable in cryogenic, pressure, and vacuum work. Also useful in the field to cover the ends of your sampling tubes or across the lip of your sampling jar. Use Stretch-it PTFE Sealing Tape to put the properties of PTFE where you need them.

Part Number	Width	Case Part Number	Quantity Per Case
J79971	3/8"	J79971CS	15
J79972	1/2"	J79972CS	10
J79973	5/8"	J79973CS	10

J79986	6"	J79986CS	4
J79987	7"	J79987CS	4

PTFE Perforated Tape

Sci/Spec has taken our most popular size PTFE Tape and made it even more convenient. This tape is perforated for easy tearing into 4" squares. Easier to use in the field than regular PTFE while still having the ability to seal cover or insulated irregular surfaces.
