## New Position Opening – October 2016 – Plumsteadville, PA

### Title: Machinist – CNC Swiss

#### Brief Job Description

Great career opportunity for experienced CNC Swiss machinist. We have an immediate opening available for the set up and operation of our Star CNC Swiss turning centers. Good problem solving skills and experience with the setup and manufacture of complex medical components is required. This position will present opportunities to work together on new and challenging projects resulting in a rewarding team experience .

Come join our professional team of skilled machinists who are manufacturing precise components for analytical instruments, surgical instruments and medical devices. Put your skills to work in a first class environment where your efforts are rewarded with good pay and benefits. First shift position available with very competitive hourly rates depending on experience. Optional overtime is routinely available as well. We have a growing, clean, air conditioned and professional manufacturing facility and are actively seeking the next member of our manufacturing team. This could be you!

#### Salary

Salary is negotiable depending on the applicants experience, education, formal training and other qualifications. The salary range for this position is \$20.00 - \$25.00 per hour. Opportunities are available for advancement and raises depending on the employees' performance of duties and responsibilities and contribution to the success of the company. Excellent benefits package available.

#### Hours

40 hours per week is expected for this full time position. Hours are somewhat flexible within our normal operating hours Monday through Friday (between 6:30 am and 6:00 pm). Overtime is available but generally not required.

#### References

Both personal and professional references are required. References will be contacted and thoroughly checked.

#### Applicant Requirements

Education: A minimum high school diploma is required. Potential candidates should have a comprehensive understanding of sliding headstock machine setup and operation. Experience need not be limited to Star swiss turning centers. As minor program editing will be expected of this position, G-code comprehension will be necessary. Ability to read and understand drawings and use basic measurement tools to verify accuracy is required.
